Heiko Stemmann, Winrich A. Freiwald, Aurel Wänig, Erich L. Schulzke, Christian W. Eurich

Maciej T. Lazarewicz, Sandhitsu Das, Leif H. Finkel

Timothy Melano, Charles M. Higgins

Emilio Salinas

Baran Çürüklü, Anders Lansner

Zuley Rivera-Alvidrez, Charles M. Higgins

B.A. Siegler, M. Ritchey, J.E. Rubin

Rüdiger Kupper, Marc-Oliver Gewaltig, Ursula Körner, Edgar Körner

M. Szabo, R. Almeida, G. Deco, M. Stetter

Benoit Gaillard, Jianfeng Feng

Nadja Schinkel, Klaus R. Pawelzik, Udo A. Ernst

Yoshiki Kashimori, Nobuyuki Suzuki, Kazuhisa Fujita, Meihong Zheng, Takeshi Kambara

Single-neuron and population coding

Peng Xu, Pamela Abshire

Sensory systems

Patrick D. Roberts

Kazuhisa Fujita, Yoshiki Kashimori, Takeshi Kambara

Enrico Rossoni, Gareth Leng, Jianfeng Feng

Hippocampus

Alexei V. Samsonovich, Giorgio A. Ascoli

Alan H. Bond

A. Madany Mamlouk, H. Sharp, K. M. L. Menne, U. G. Hofmann, T. Martinetz

TITLE

Guest editorial

Accurate Dynamical Models of Interneuronal GABAergic Channel Physiologies

102

WHY ARE MOST NEURONS IN THE HEAD?

106

Algorithmic reconstruction of complete axonal arborizations in rat hippocampal neuroi

107

LEARNING INTENTIONAL BEHAVIOR IN THE K-MODEL OF THE AMYGDALA AND THE C

112

In-vitro neuronal networks: evidence for synaptic plasticity

114

A synapse which can switch from inhibitory to excitatory and back

115

Evolving Processing Speed Asymmetries and Hemispheric Interactions in a Neural Net

202

Recreating active states in vitro with a dynamic clamp protocol

205

Neurokinematic Modeling of Complex Swimming Patterns of the Larval Zebrafish

207

Self-organization of color opponent receptive fields and laterally connected orientation

302

The computational model for border-ownership determination consisting of surroundir

122

Study of spatial frequency selectivity and its spatial organization in the visual cortex t

123

Physiologically inspired neural model for the encoding of face spaces

124

A direct, interval-based method for reconstructing stimuli from noise-robust tuning cl

126

Adaptive contrast gain control and information maximization

127

A Possible Mechanism of Curvature Coding in Early Vision

228

Features That Draw Visual Attention: An Information Theoretic Perspective

231

Encoding of Dynamic Visual Stimuli by Primate Area MT Neurons

232

Recognition of Temporal Event Sequences by a Network of Cortical Neurons

234

The Neuronal Basis of Direction Selectivity in Lobula Plate Tangential Cells

321

A model of target selection based on goal-dependent modulation

322

A Model of the Summation Pools within the Layer 4 (Area 17)

323

Contrast Saturation in a Neuronally-Based Model of Elementary Motion Detection

324

Spike-timing dependent plasticity as a mechanism for ocular dominance shift

325

Spike-latency codes and the effect of saccades

326

A neuronal model for the shaping of feature selectivity in IT by visual categorization

327

Modelling a Visual Discrimination Task

328

Robust integration and detection of noisy contours in a probabilistic neural model

329

A functional role of multiple spatial resolution maps in form perception along the vent

330

Threshold Detection of Intensity Flashes in the Blowfly Photoreceptor by an Ideal Obs

305

Recurrent Neural Network Generates a Basis for Sensory Image Cancellation

133

Dynamic population coding for detecting the distance and size of an object in electrol

134

A model for synchronous bursting of oxytocin neurons

135

Algorithmic Description of Hippocampal Granule Cell Dendritic Morphology

136

Representing episodic memory in a system-level model of the brain

141

Unsupervised spike sorting with ICA and its evaluation using GENESIS simulations
